SITUATION SUMMARY

Tropical Storm Simon

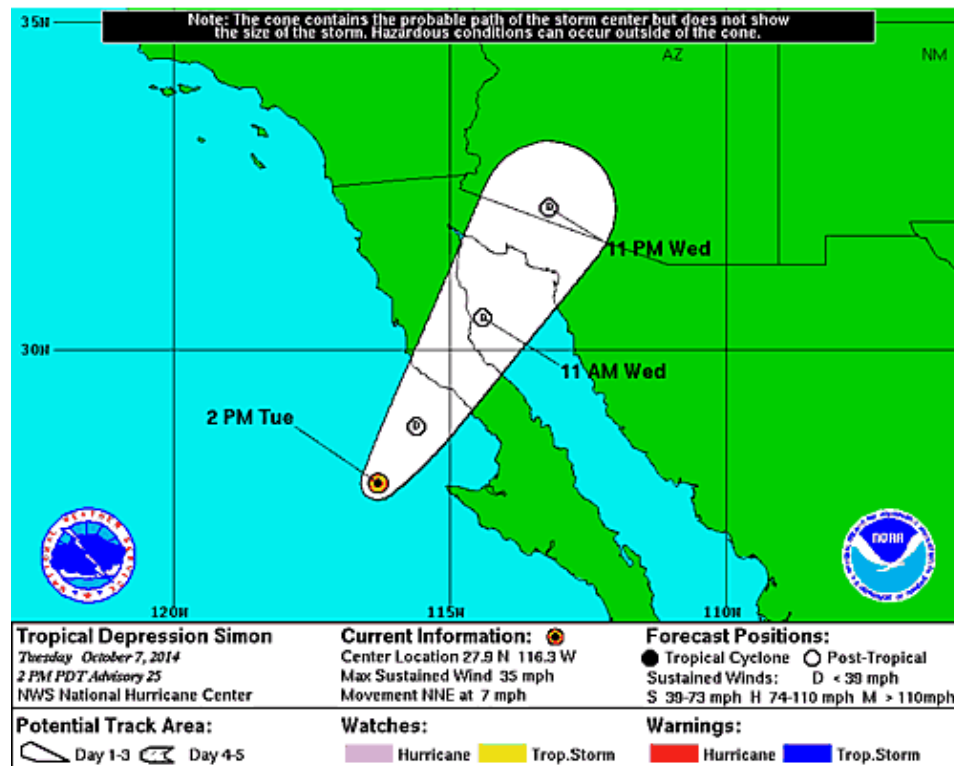

An ASCAT pass from a few hours ago indicates that there are no longer winds of tropical storm force in the circulation. Therefore the system is being downgraded to a depression and the tropical storm watch for Baja California is discontinued.

Potential Hazards Affecting Land in Mexico:

Simon or its remnant is expected to produce storm total rainfall amounts of 3 to 5 inches with isolated amounts around 8 inches through Wednesday across northern portions of the Baja California peninsula and the state of Sonora in northwestern Mexico. Over the next few days. The government of Mexico has discontinued the Tropical Storm Watch from Punta Abreojos to Punta Eugenia.

Potential Hazards Affecting Land in California:

Moisture from weakening Tropical Depression Simon will continue to spread northward into far southern and eastern portions of southern California through tonight, then move east on Wednesday night. This will bring a chance of showers through Wednesday afternoon, with a slight chance of thunderstorms each afternoon through early evening. Drier and slightly cooler conditions will follow for coastal areas Thursday and Friday, followed by warming and lower inland humidities for the weekend through early next week.

SITUATION SUMMARY

Cal OES Coastal Region – Planned Event and Major Exercise

Monday, 10/06/14 through Tuesday, 10/14/14, the San Francisco Center for Humanitarian Disaster Response (SFCHADR), announces the return of Fleet Week to San Francisco. This year's program will feature several exercises, which include the delivery and demonstration of a United States Marine Corps (USMC) Shock Trauma Platoon at General Hospital, the 'Fifth Annual Senior Leaders' Seminar, the return of the popular 'K9 Heroes Program', and the exchange of best practices with San Francisco Fire Department's (SFFD's) Urban Search and Rescue team. Military medical and air teams will demonstrate the military's capability to enhance overall patient care capabilities within the city following a large-scale disaster (by invitation only).

Further San Francisco Fleet Week Information: <http://www.fleetweek.us/>

The Blue Angels will be conducting practice flyovers around San Francisco on Thursday, 10/09/14 and Friday, 10/10/14, from 1230 – 1600 hours.

The Air Show will commence on Saturday, 10/11/14 and go through Sunday, 10/12/14.

WEATHER

WEATHER SYNOPSIS BY REGION:

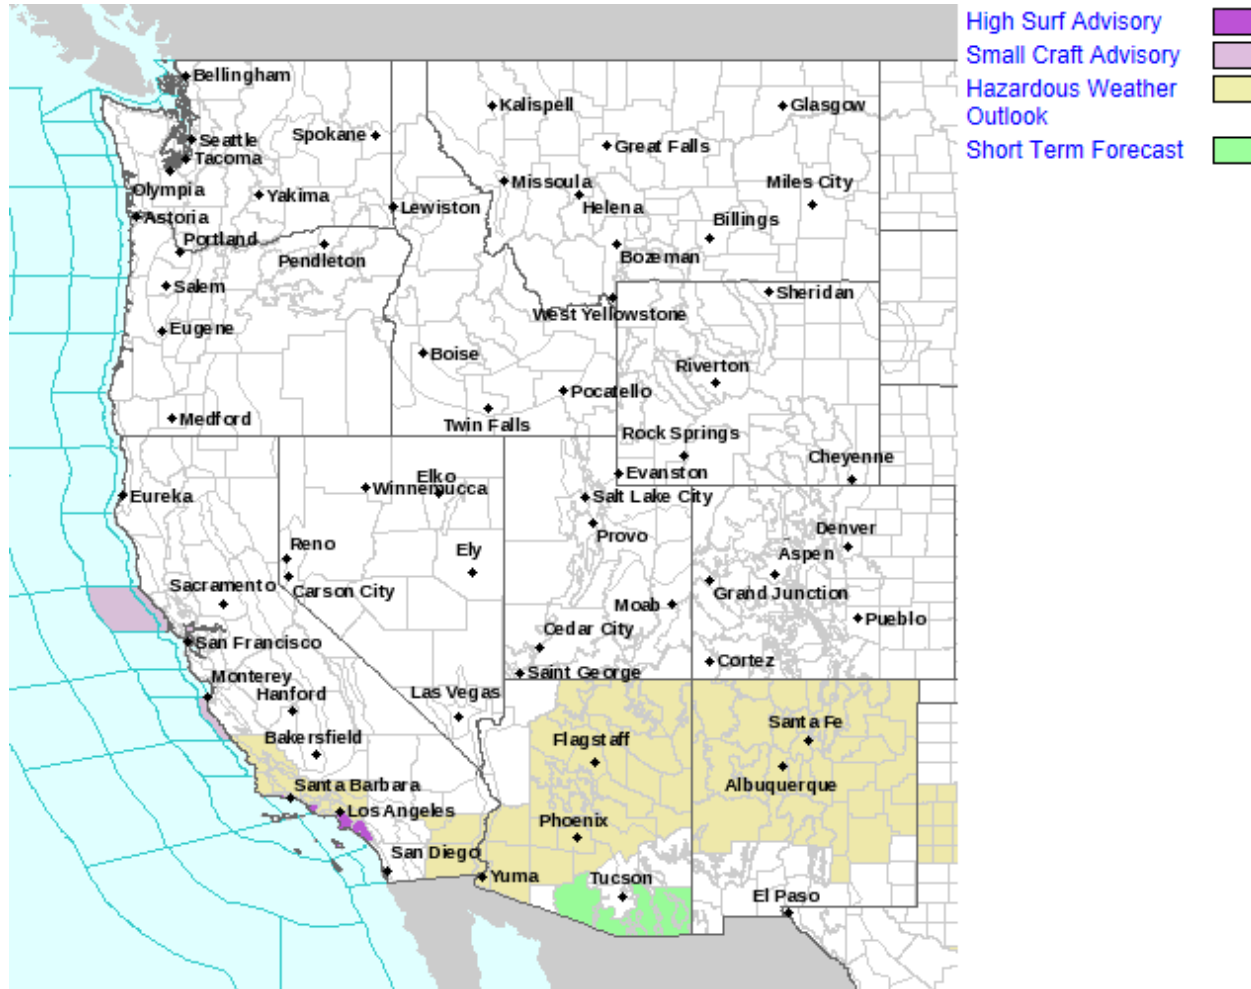

NORTHERN CALIFORNIA

The strong upper level high pressure ridge of the past weekend has broadened and weakened somewhat over the past two days. This produced some moderation of temperatures over the northern California, and the currently low humidity pattern will also start to moderate over a larger area late today and Wednesday. The high gets to its weakest point Thursday night, as a weak, dry Pacific cold front basically dies over the north half of northern California. High pressure aloft quickly rebounds Friday into the weekend, for renewed warming and drying. Surface pressure gradients tighten up late Saturday, and Sunday could end up being a day with fairly widespread, moderate-strength dry north-northeast to east winds. We are watching next week closely for a potential change in the larger-scale governing weather pattern. There are hints on mid to longer-range models that by next Tuesday or Wednesday, a stronger west-northwest Pacific jet stream will be working its way into Oregon and at least the northwestern portion of California. Models are still rather inconsistent about precipitation amounts that might come to the northern California, but there does appear to be some potential for a cool moist storm about midweek or beyond.

SOUTHERN CALIFORNIA

Scattered wet thunderstorms will occur in the deserts from the Coachella Valley eastward through Wednesday. One or two thunderstorms may also occur in adjacent areas of the San Bernardino and Cleveland National Forest. A slow cooling trend is expected to continue the next few days with temperatures returning to near normal readings by Thursday. Minimum relative humidity will generally remain in the teens outside the deserts this week. Next weekend, very warm and dry conditions are expected to return. Light offshore winds may be possible Saturday night.
